DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Enokida et al (JP-10140145).

Enokida discloses an organic electroluminescent element comprises a complex compound represented by formula I wherein x is O or S, Z is carbon, R1-R11 are each a hydrogen or alkyl, and M is tetravalent metal such as Pt, Pd, Zr, Si, Ge (Page 4, [0017]). Accordingly, Formula I has the same structure as the claimed formula (I).

With respect to claims 2-3, Enokida discloses that the complex compound can be used alone as a luminescent material in a luminescent layer(abstract).

It is noted that claim 4 is a product-by-process claims. Product-by-process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps (MPEP 2113). "[E]ven though product – by process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious

from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 227 USPQ 964, 966.
